ConsultEase UI Mockup

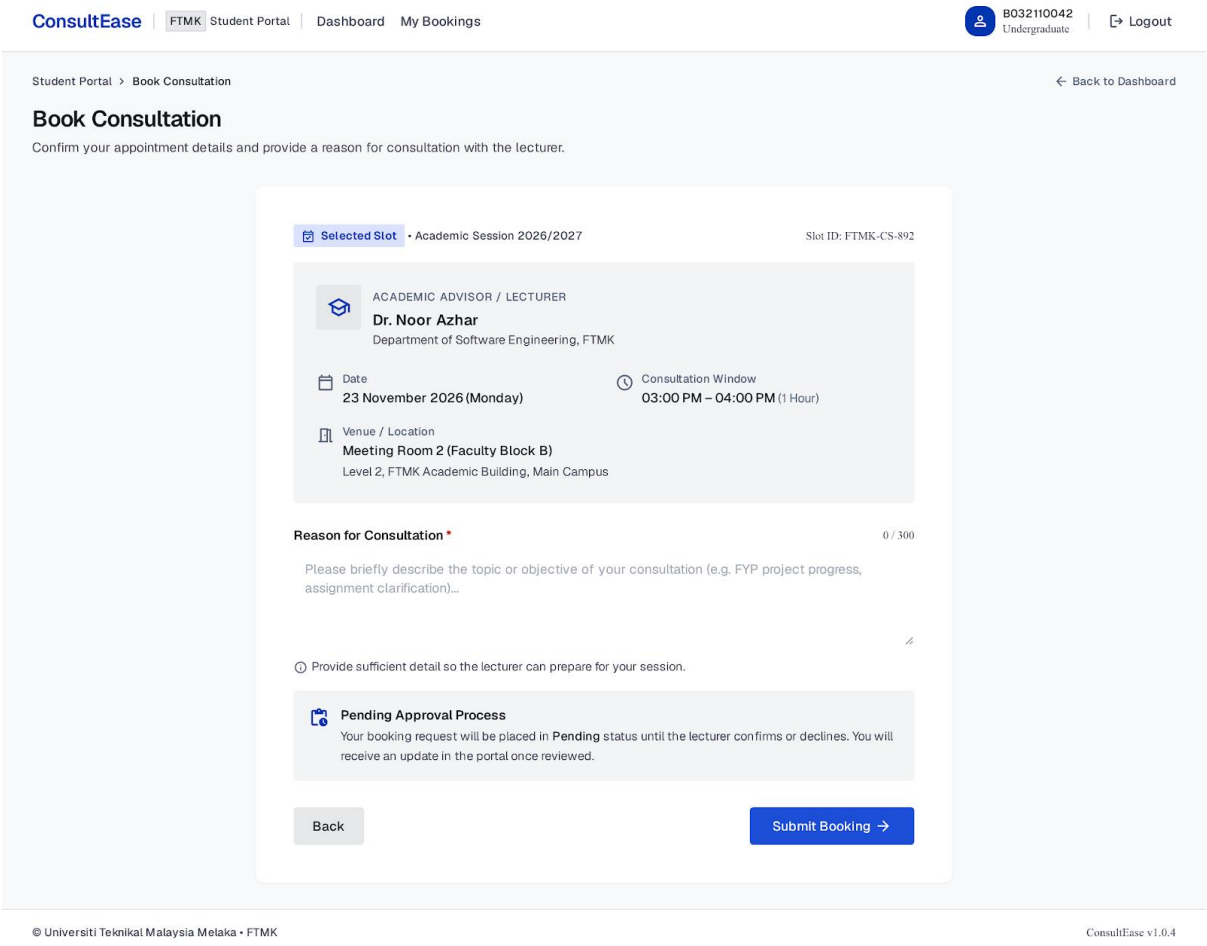

Login Page - The Login Page allows students and lecturers to access the ConsultEase system using their registered email address and password. The system identifies the user's role and directs them to the appropriate dashboard after successful authentication.

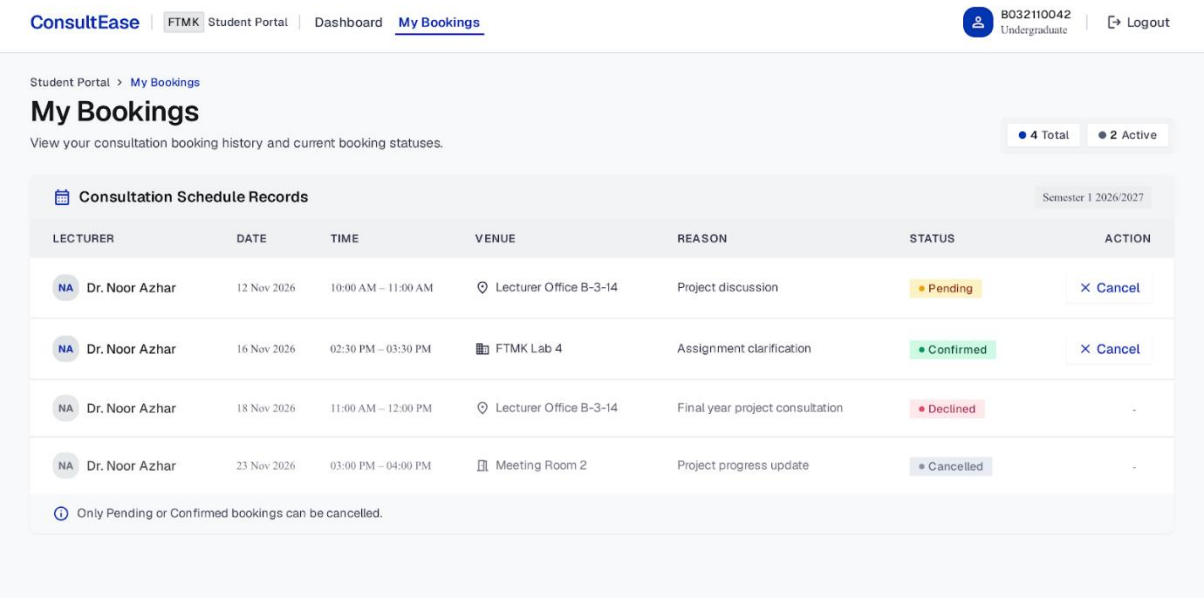

Student Dashboard - The Student Dashboard allows students to select a lecturer and view available consultation slots. Each slot displays the date, start time, end time and venue. Students can select an available slot to proceed with a booking request.

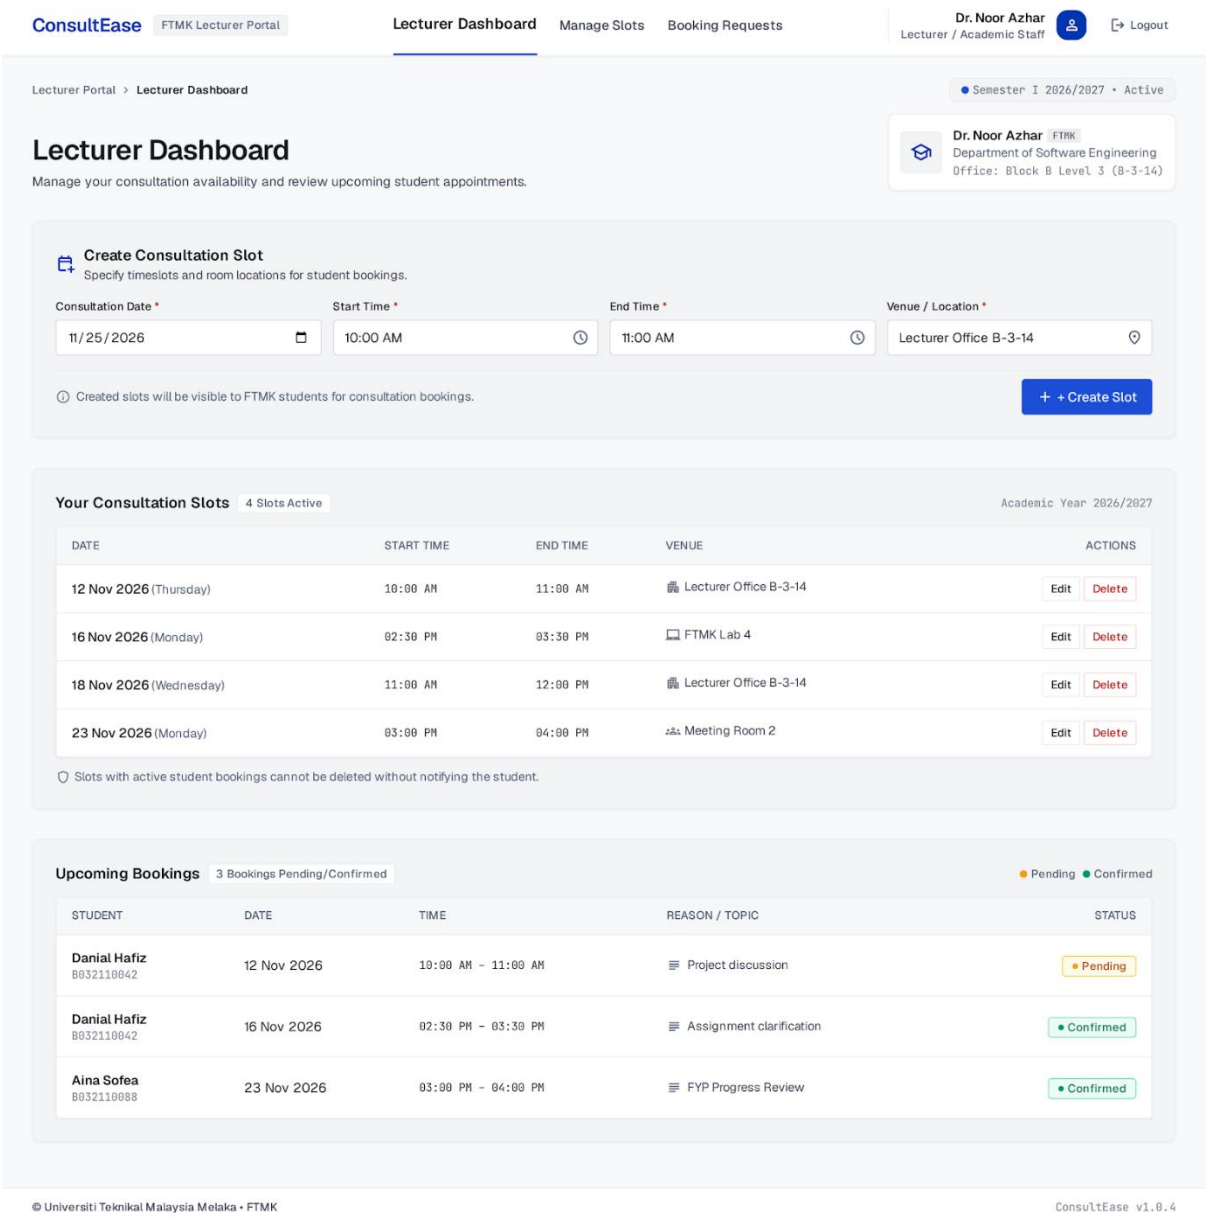

Book Consultation - The Book Consultation Page displays the selected lecturer and consultation slot details. Students are required to enter a reason for consultation before submitting their booking request. Once submitted, the booking will initially have a Pending status until the lecturer confirms or declines it.

My Bookings - The My Bookings Page allows students to view their consultation booking history and monitor booking statuses, including Pending, Confirmed, Declined and Cancelled. Students can also cancel eligible bookings when necessary.

Lecturer Dashboard - The Lecturer Dashboard allows lecturers to manage their consultation availability by creating, editing and deleting consultation slots. Lecturers can specify the consultation date, start time, end time and venue, and view upcoming student bookings.

Booking Request - The Booking Requests Page allows lecturers to review consultation requests submitted by students. Lecturers can view the consultation details and reasons provided, then confirm or decline pending requests. Updated booking statuses will be visible to students through the My Bookings Page.
